PROFESSIONAL SUMMARY

Software Engineer with 3+ years of professional experience designing, building, and scaling production-grade web applications using React.js, JavaScript (ES6+), TypeScript, Redux, and modern CSS frameworks (Tailwind CSS, Bootstrap). Experienced in component architecture, state management, RESTful API integration, and performance optimization, with a focus on improving page-load speed, Core Web Vitals, and code maintainability across production releases. Skilled in translating complex business requirements into clean, scalable, accessible web applications within Agile/Scrum teams. Familiar with data structures, algorithms, and problem-solving using C++ and Java, supporting efficient software development across frontend interfaces and backend services.

CORE COMPETENCIES

React.js | JavaScript (ES6+) | TypeScript | Java | Redux | React Query | RESTful API Integration | Responsive Web Design | Performance Optimization | Component Architecture | State Management | Cross-Browser Compatibility | Agile/Scrum | Unit & Integration Testing | Web Accessibility (WCAG/ADA) | Git/GitHub | SQL (MySQL) | CI/CD | Debugging & Incident Resolution | GitHub Copilot | Code Reviews

TECHNICAL SKILLS

Languages: HTML5, CSS3, JavaScript (ES6+), TypeScript, C++, Java

Frameworks / Libs: React.js, Redux, React Query, Tailwind CSS, Bootstrap, jQuery

Tools & Platforms: Git, GitHub, VS Code, Postman, Webpack, Vite, npm / yarn

Databases: SQL (MySQL), query and database performance optimisation, localStorage / IndexedDB

Practices: RESTful API Integration, Responsive Design, Cross-Browser Compatibility, Agile / Scrum, Code Reviews, Debugging & Production Support, CI/CD (developer workflow), ADA / WCAG Accessibility

AI Tools: GitHub Copilot (AI-assisted development)

WORK EXPERIENCE

Software Engineer · Sparx IT Solutions Pvt. Ltd.

Noida, UP | Aug 2023 – Present (3+ years)

- Owned front-end delivery for 8+ client web applications, from requirements through production release, and cut average page load time by 35% using code-splitting, lazy loading, and memoisation.
- Led development of Wave Foody, a multi-panel restaurant management platform used by 5 user roles (Super Admin, Restaurant, Kitchen, Server, Customer), including role-based login flows and a real-time order-tracking dashboard.
- Connected the UI to 30+ REST APIs and added optimistic updates and error boundaries, making screens feel faster and reducing API-related bug reports by 40%.
- Modernised a legacy jQuery product by migrating it to a component-based React codebase, shrinking the code by 28% and helping new developers get productive faster.
- Built multi-step application forms with validation, digital signature capture, and PDF export, now used by 1,000+ end-users across client deployments.
- Worked daily with UI/UX designers, back-end engineers, and QA in Agile sprints (planning, stand-ups) to deliver client releases on schedule.
- Wrote and optimised MySQL queries for application features, and tuned application and database performance to keep pages and APIs responsive.
- Shipped code through CI/CD pipelines as a developer, preparing builds and fixing issues to support smooth, on-time releases.
- Participated in peer code reviews and followed coding standards to keep the codebase clean, consistent, and maintainable.
- Debugged and resolved production issues, giving technical support during live incidents and working with QA, Security, L2 Support, and cross-functional teams to restore service quickly.
- Used GitHub Copilot to speed up development, write boilerplate and tests, and explore solutions faster.
- Wrote unit and integration tests for business-critical modules, holding 80%+ coverage and reducing regression defects.
- Audited Core Web Vitals (LCP, CLS, FID) on client websites and fixed the bottlenecks, reaching Lighthouse performance scores of 90+ on flagship projects.

KEY PROJECTS

Wave Foody – Multi-Panel Restaurant Management System | React.js · Redux · REST API · Tailwind CSS

- Designed a role-based dashboard system for Super Admin, Restaurant, Kitchen, Server, and Customer panels with granular permission controls.
- Built a real-time order pipeline connecting kitchen display to server tablets, reducing average order fulfilment time by 20%.
- Implemented dynamic menu management with live inventory updates, form validations, and toast notifications for seamless UX.

Annexica – Smart Multi-Step Form with Signature Capture | JavaScript · HTML5 Canvas · Web APIs

- Built a multi-step smart form with real-time field validation, conditional rendering, and digital signature capture via HTML5 Canvas.
- Integrated PDF export and database persistence, enabling users to save, resume, print, and submit complex application forms.

IT Dashboard – Real-Time Municipal Analytics [\[Live\]](#) | React.js · JavaScript · Google Sheets API · GIS

- Engineered a live data pipeline converting Google Sheets to JSON for real-time frontend rendering of municipal waste metrics.
- Built interactive GIS mapping visualisations and KPI cards to support data-driven decision-making for urban sustainability initiatives.

SustainEco – Environmental Consulting Website [\[Live\]](#) | React.js · JavaScript

- Developed a fully responsive marketing website with animated UI components, translating sustainability data into engaging visual storytelling.
- Achieved a Lighthouse score of 92+ through image optimisation, lazy loading, and semantic HTML for strong SEO performance.

Step-by-Step School – Multi-Step Admission Form | Vanilla JavaScript · HTML5 · CSS3

- Created a multi-step admission form with client-side validation for required fields, email/phone formats, date ranges, and file type/size.
- Added a save & resume feature using localStorage and a step-progress indicator improving form completion rate by an estimated 30%.

EDUCATION

B.Tech – Information Technology · Jaypee University of Information Technology | Aug 2019 – Jul 2023

Solan, HP | CGPA: 7.9 / 10

CERTIFICATIONS & ACHIEVEMENTS

- Problem Solving Certificate – HackerRank
- DSA Carnival Participant – CodeChef
- Completed 30-Day JavaScript Challenge with consistent streak on HackerRank
