## OBJECTIVE

Software Engineer with 2+ years of experience in developing scalable annd responsive web applications. Skilled in React.js, modern JavaScript (ES6+), state management, and RESTful API integration. Strong foundation in C, C++, and data structures & algorithms, enabling efficient problem-solving and performance optimization.
Seeking to contribute technical expertise and innovative solutions to a growth-oriented organization while continuously enhancing my skills in full-stack development.

## SKILLS

| | |
|---|---|
| **Database** | MySQL |
| **Programming Language** | C++, Python |
| **Front-end** | HTML, CSS, JavaScript, jQuery |
| **Frameworks** | React Js, Tailwind CSS, Bootstrap |
| **IDE** | Visual Studio 2017, 2019, 2022, MS SQL Server 2014, 2016, 2019 |
| **Tools / Platforms** | Git, GitHub |

## EXPERIENCE

**Sparx IT Solutions | Software Engineer**
**Noida, UP | Aug 2023 – Present**

- Developed responsive web interfaces using React.js and modern JavaScript (ES6+).
- Integrated RESTful APIs to enable smooth client-server communication.
- Managed complex state and built scalable, efficient web solutions.
- Write clean, modular, and maintainable code for long-term project success.
- Focused on performance, responsiveness, and user experience.

## PROFESSIONAL PROJECTS

**Wave Foody – Multi-Panel Restaurant Management System (Ongoing)**
Built a complete multi-panel restaurant management system with dedicated interfaces for Super Admin, Restaurant, Kitchen, Server, and Customer roles. Implemented role-based authentication and dynamic data flow between panels to manage orders, menus, staff, and customers in real time. Added interactive UI, form validations, and API integrations to ensure smooth operations and accurate order tracking across all panels.
**Tech Stacks:** React.js, JavaScript, REST API

**Step-by-Step School – Multi-Step Form Validation(Completed)**
Created a multi-step admission/enquiry form using vanilla JavaScript with complete client-side validation. Implemented checks for required fields, email/phone formats, date ranges, and file size/type before allowing users to move to the next step. Added inline error messages, a step progress indicator, and a “save & resume” option using localStorage.
**Tech Stacks:** JavaScript

**Annexica – Smart Multi-Step Form with Signature Capture & Data Persistence(Completed)**

Annexica, a smart multi-step form application with real-time validation, digital signature capture, and seamless data persistence. Users can fill out, print, export to PDF, and submit forms, with all data securely stored in a database.

**Tech Stacks:** JavaScript, HTML5 Canvas, Local Storage

## PERSONAL PROJECTS

**IT Dashboard**

Engineered a real-time IT dashboard that automates data synchronization by converting **Google Sheets** into **JSON** for live frontend rendering. I developed responsive interfaces to visualize municipal waste metrics and **GIS mapping**, streamlining data-driven decision-making and project transparency for urban sustainability initiatives.
**Tech Stacks:** React.js, JavaScript
**URL:-** https://chintandashboard.github.io/It-dashboard/

**Handwritten Convolutional Neural Network**

Developed a custom **Convolutional Neural Network (CNN)** to perform handwritten digit recognition, enabling the system to accurately classify user-uploaded images into numerical values. I engineered the end-to-end pipeline, from image preprocessing and feature extraction to real-time inference, ensuring high prediction accuracy and a seamless user interface for digit identification.
**Tech Stacks:** Python
**URL:-** https://colab.research.google.com/github/Manishgupta-coder/HandwrittenCharacterRecognitionUsingCNN/blob/main/Major_Project_Digit_Recognition.ipynb

**Sustain Eco**

Developed a modern, responsive website for **Sustaineco** using **React.js** and **JavaScript**, focusing on performance and seamless user navigation for environmental consulting services. I translated complex sustainability data into clean, interactive UI components, ensuring a high-quality frontend experience that effectively communicates the firm's impact on urban waste management and green initiatives.

**Tech Stacks:** React.js ,Javascript

**URL:-** https://www.sustaineco.co.in/

## CERTIFICATIONS

**Problem Solving** - HackerRank.

**DSA CARNIVAL** – CodeChef

## EDUCATION

**Jaypee University Of Information Technology, B.Tech** **Aug 2019-July2023**

**Major:** Information Technology **CGPA:7.9**
