SUMMARY

Frontend engineer with 3+ years of experience in React.js, TypeScript and Redux. At Sparx IT Solutions, shipped 8+ client web applications from requirements to release and supported them afterwards. Average page load time on those apps dropped 35%, and API-related bug reports dropped 40%. Works in Agile/Scrum teams with UI/UX designers, QA and backend engineers. Comfortable with data structures and algorithms.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, Java, C++
Frameworks and libraries: React.js, React Hooks, Context API, Redux (State Management), React Query, jQuery
Styling and UI: Tailwind CSS, Bootstrap, Responsive Web Design, Cross-Browser Compatibility, Web Accessibility (WCAG/ADA), Reusable Component Libraries
APIs and data: RESTful APIs, Google Sheets API, Postman, SQL, MySQL, Query Optimization, IndexedDB, localStorage
Testing: Unit Testing, Integration Testing, Regression Testing, Test Coverage, Code Reviews
Performance and SEO: Core Web Vitals (LCP, INP, CLS), Lighthouse, Code Splitting, Lazy Loading, Memoization, Semantic HTML
Tools and OS: Git, GitHub, CI/CD, Linux, Webpack, Vite, npm, yarn, VS Code, GitHub Copilot
Practices: Agile/Scrum, Debugging, Production Support, Incident Resolution, Front-End Architecture, Design-to-Code Translation
Fundamentals: Data Structures and Algorithms (DSA), Problem Solving, Complexity Analysis

WORK EXPERIENCE

Software Engineer | Sparx IT Solutions Pvt. Ltd. | Noida, India | Aug 2023 - Present

- Built the frontend for 8+ client web applications in React.js, TypeScript and Redux, from requirements to production release.
- Cut average page load time by 35% with code splitting, lazy loading and memoization. Lighthouse scores reached 90+.
- Led development of Wave Foody, a restaurant management platform with 5 user roles, role-based access control and a real-time order-tracking dashboard.
- Integrated 30+ REST APIs using optimistic updates and error boundaries. API-related bug reports fell by 40%.
- Rebuilt a legacy jQuery product as React.js components. The codebase shrank by 28% and new developers got up to speed faster.
- Built multi-step forms with real-time validation, digital signature capture and PDF export. 1,000+ end users across client deployments use them.
- Wrote unit and integration tests for business-critical modules. Coverage stayed above 80% and regression defects went down.
- Fixed Core Web Vitals problems (LCP, INP, CLS) on client websites, which helped both performance and SEO.
- Optimized MySQL queries to keep pages and APIs responsive.
- Planned the front-end architecture for large multi-role apps, with reusable components and shared patterns so the code stayed easy to maintain as the team shipped.
- Shipped releases through CI/CD pipelines and peer code reviews. Fixed live production UI issues together with QA, Security and L2 Support.
- Worked with UI/UX designers and backend engineers in Agile/Scrum sprints.
- Used GitHub Copilot for boilerplate, writing tests and trying out solutions.

PROJECTS

Wave Foody: Multi-Panel Restaurant Management System | React.js, Redux, REST API, Tailwind CSS

- Designed role-based dashboards for Super Admin, Restaurant, Kitchen, Server and Customer panels, with granular permission controls.
- Built a real-time order pipeline from kitchen displays to server tablets. Average order fulfilment time dropped 20%.
- Added menu management with live inventory updates, form validation and toast notifications.

IT Dashboard: Real-Time Municipal Analytics | React.js, JavaScript, Google Sheets API, GIS | Live

- Built a live data pipeline that converts Google Sheets to JSON for real-time charts of municipal waste metrics.
- Developed interactive GIS maps and KPI cards used to track municipal waste and plan sustainability work.

Annexica: Multi-Step Form with Signature Capture | JavaScript, HTML5 Canvas, Web APIs

- Built a multi-step form with real-time validation, conditional rendering and HTML5 Canvas signature capture.
- Added PDF export and database persistence so users can save, resume, print and submit long applications.

SustainEco: Environmental Consulting Website | React.js, JavaScript | Live

- Built a responsive website with animated UI components that present sustainability data.
- Reached a Lighthouse score of 92+ with image optimization, lazy loading and semantic HTML.

Step-by-Step School: Multi-Step Admission Form | JavaScript, HTML5, CSS3

- Built an admission form with client-side validation for required fields, email/phone formats, date ranges and file uploads.
- Added save-and-resume with localStorage and a step-progress indicator.

EDUCATION

B.Tech, Information Technology | Jaypee University of Information Technology, Solan, HP | 2019 - 2023 | CGPA: 7.9/10

CERTIFICATIONS AND ACHIEVEMENTS

- Problem Solving Certificate, HackerRank
- DSA Carnival Participant, CodeChef
- Completed 30-Day JavaScript Challenge, HackerRank
